

IVAX Pharmaceuticals Runcorn

Case Study

P J McGrath and Sons, specialist flooring contractors, working with the support of NCC, have now completed more than 3,200 square metres of high performance hygienic resin flooring in Runcorn. This was for leading generic pharmaceuticals manufacturer IVAX Pharmaceuticals at their 'state of the art' modern product facility in Preston Brook.

During the last few years P J McGrath have applied a total of more than 1,200 square metres of high tolerance, cleanroom standard floors and with the latest phase completed, there are also now 2,000 square metres of hygienic and easy-to-clean pharmaceutical processing and packaging area floors, all using advanced Sikafloor resin systems supplied by **NCC**.

This latest phase was completed using a bright blue, Sikafloor 261, epoxy resin based, self-smoothing resin mortar, finished with a silk-matt coating of Sikafloor 356N, a solvent-free, polyurethane resin as the top coat, Sikafloor 261 is solvent-free and available in almost any colour and is absolutely ideal for providing durable seamless cleanroom and hygienic floors. Slip resistant and non-slip profiles have also been incorporated where required for operator safety.
